

## Barrier gestures and other distancing instructions ...!?

Update as of August 13, 2021

In just over a year our daily life has shifted to another space-time and this unthinkable anomaly is taking root day after day like the new Standard!

In the name of an illusory, scientifically useless or even counterproductive protection, these "leaders" "dictate" to us rules of behaviour that are more and more absurd but obviously more and more liberticidal ... They "muzzle" our society, isolate individuals from each other by organizing a universe of zombies and systematically and first and foremost destroying the economic life of the middle classes, ... to the obvious benefit of the major players in a globalized economy!

The human damage (economic, health and psychological so far deliberately ignored) is already and will be in the near future immensely greater than that caused by an epidemic which, until proved to the contrary, remains broadly within the norm of those of previous decades. ...

- [Some comparative data:

The only reliable indicator of the dangerousness of a contagious disease is the mortality rate (the ratio between the number of deaths and that of the population) and not that of lethality (the % of deaths in relation to the number of symptomatic people i.e. affected by this infection).

For the year 2020, with 64,078 deaths "attributed" to Covid-19 for 67 million inhabitants, it is therefore 0.095, a figure to be widely weighted as it is increasingly demonstrated that since the beginning, in France, the "Covid stamping" is applied and continues to be applied without any scientific and / and administrative rigor. In addition, and in fact, at the world level with 1,819,905 "recorded" deaths (also to be put into perspective for the same reasons as in France) for a population of 7.8 billion it falls to 0.023 ..., four times less than in France, which should raise some questions!

In fact, this ratio of nearly 1% would indicate that one in a hundred people in France would have died of complications following an infection by Covid-19 (and not killed by its mere presence in the body!) Which, for uninformed people can easily appear very worrying...

However, in our country, more than 600,000 individuals die each year (all causes combined, i.e. on average more than 1,650 per day but of course especially from old age) which reduces the risk of death following this viral infection to 6% of the all deaths!

Knowing also that the median age of deaths declared Covid is 84 years (\*) and that below 70 years their percentage is negligible (less in 2020 than in 2019!) The dangerousness of this "pandemic", politically and maintained in the media, deserves, to say the least, to be widely debated!

(\*) As a reminder: In 2019, life expectancy at birth was 79.8 years for men and 85.7 years for women in mainland France.]

The establishment of a "sanitary pass", officially in force since July 21, 2021, which has just been validated by the Constitutional Council in disregard of our fundamental rights, profane the very foundations of our Republic. It is obvious that the prelude to a generalized "vaccine" constraint, the acceptance of which alone will confer a certificate of "good citizenship"!

However, it turns out that these "injections", officially experimental but legitimized by a "conditional marketing authorization" issued by the "health authorities" (for us, the European Commission) are already responsible for very serious "side effects" (to put it mildly!). In fact in sufficient numbers to overturn the sacrosanct mantra of "risk-benefit" which allows a certain% of victims to be sacrificed in the name of the interests of the greatest number.

For those who want to be informed (instead of believing they are!) We invite them first to consult this page of the site [Covidhub.ch](https://covidhub.ch) (\*) and then to do their own research ... ([Here!](#))

(\*) French-speaking online information platform, free and plural. The site is the result of an initiative of citizens (doctors, journalists, teachers, artists, researchers, and thinkers), invested in gathering information useful for a more enlightened understanding of the situation, in Switzerland and elsewhere. Our conviction is simple: we need a fair health policy, transparent information, free and open scientific debate.

We are well aware that the global media coverage of a mortal danger, propagated by an invisible but omnipresent agent, is far too emotionally powerful to leave the necessary space for reflection for objectivity. It is therefore not a question here of arguing and trying to convince those who adhere to the official narrative but simply of affirming our determination to resist and disobey government diktats and to inform as clearly as possible all those who would like to stay with us.

Here we refuse to submit to such nonsense and in our house, as long as possible, none of these irrational guidelines will be applied. We consider ourselves healthy in body and especially in spirit and, as we have done since the beginning of this planetary mystification, will do everything in our power, in the future to remain so!

In particular, we will not submit to an "injection" of experimental products whose stated objective is to modify our immune system!

We know that many, many people see no other choice, willingly consent to it, and we have no right to judge them; so, if they approve of us, of course they are welcome.

On the other hand, to all those who believe themselves to be out of danger in this way only perceive in our attitude the opportunity to escape the ambient norm without truly adhering to our discourse, we can only advise to go their way.

It is therefore up to you, in full transparency and under these conditions, to decide whether or not to come to us!
